INTRODUCTION NOTE

Transfert Environnement et Société (hereinafter “Transfert”) was mandated by Nutrinor – Gilbert Renewable Energy (hereinafter “NGER”) to facilitate discussions, moderate exchanges, and take notes during meetings of the Liaison Committee covering the Dune-du-Nord Wind Farm (hereinafter “PEDDN”) and the Grosse-Île Wind Farm Project (hereinafter “PEDGI”).

This document is not a verbatim transcript. It aims to faithfully summarize the key elements raised during discussions and to reflect the questions, comments, and concerns expressed during the meeting. These elements have been grouped by theme and summarized for information purposes. The content of these minutes should not be considered as direct quotations from NGER or from meeting participants. Scientific clarity, transparency, and methodological rigor guided the preparation of this document.

1. SUMARY

The Liaison Committee meeting for PEDDN and PEDGI was held on April 23, 2026, at the Cap-aux-Meules Recreation Centre, in a hybrid format. Nine members attended the meeting to discuss upcoming investments and planned project activities in greater detail.

Thursday, April 23, 2026

1:00 p.m. to 3:30 p.m.

Cap-aux-Meules recreation center

9 members present

Follow-up actions

- Share Volume 8 of the environmental impact assessment submitted to the Ministry of the Environment, the Fight Against Climate Change, with Liaison Committee members.
- Share upcoming communications related to PEDDN, particularly regarding maintenance work.
- Review, with the Liaison Committee, its current composition and decide at the next meeting whether it would be appropriate to add seats for land users and community organizations.

Attendance

Category / sector	Organism	Name	Presence
Members – Municipal and Governmental Sector	Municipality of Grosse-Île	Gordon Burke	Present
	Municipality of Grosse-Île	Karina Cyr	Present
	Communauté maritime des Îles-de-la-Madeleine (CMIM)	David Richard	Present
	Communauté maritime des Îles-de-la-Madeleine (CMIM)	Jasmine Solomon	Present
Members – Environmental and community organizations	Centre de recherche sur les milieux insulaires et maritimes (CERMIM)	Sophie Yanakis	Present
	Comité ZIP des Îles-de-la-Madeleine	Jean-Philippe Lepage	Present
	Attention FragÎles	Mélanie Bourgeois	Present
	Tourisme Îles-de-la-Madeleine	Michel Bonato	Absent
Members – Economic organizations	SADC Îles-de-la-Madeleine	Daniel Gaudet	Present
	Chambre de commerce des Îles	Martin Paquet	Present
Project proponent representatives	Nutrinor – Gilbert Énergies renouvelables	Maxime Gilbert	Present
		Jean-Michel Leblanc	Present
	Alliance de l'Énergie de l'Est	Lou Landry	Present
Committee facilitation and coordination	Transfert Environnement et Société	Stéphanie Fortin	Present
		Justine Simard	Present

2. MINUTES

Meeting opening

Mr. Jean-Michel Leblanc, Operations Manager at NGER, welcomed the members of the PEDDN and PEDGI Liaison Committee.

At the start of the meeting, he informed members of the presence of Transfert Environnement et Société and invited Ms. Stéphanie Fortin, Environmental and Social Communications Specialist at Transfert, to present their role in supporting NGER.

Ms. Fortin explained that Transfert was mandated by NGER to develop a structured community engagement plan based on recognized best practices. In this context, Transfert acts as a resource person, particularly to support NGER in facilitating Liaison Committee meetings, drafting meeting minutes, and following up on outstanding questions.

Adoption of the agenda

The three meeting objectives were presented:

1 | Provide an update on the current status of the PEDGI project following the BAPE public hearings.
2 | Enhance and validate the Community Engagement Plan.
3 | Identify potential action pathways and discuss updates to dialogue mechanisms related to PEDDN and PEDGI.

The agenda was adopted. The presentation shared during the meeting is included in Appendix 1.

Members' updates

Mr. Leblanc invited members to share updates from their respective organizations.

Approval of the December 3 meeting minutes

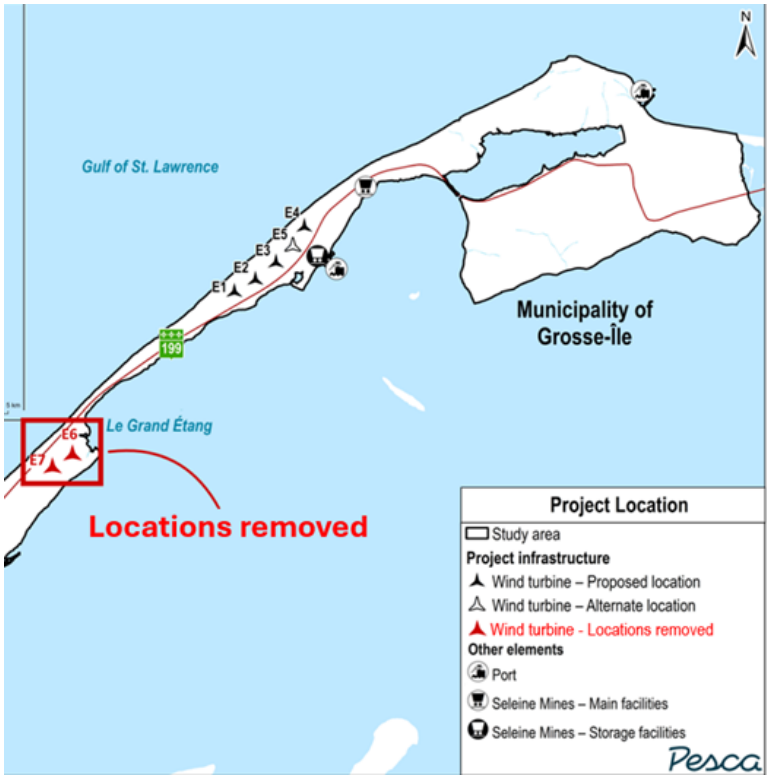

Mr. Leblanc indicated that the minutes from the December 3, 2025 meeting were sent with the meeting invitation. As no revisions were requested, the minutes were approved and will be posted on the PEDDN and Grosse-Île project websites.

Mr. Leblanc also noted that the format of meeting minutes would be adjusted going forward, as they will now be prepared by Transfert. The minutes will be circulated within a maximum of three weeks following each meeting and sent by email for review to enable faster publication than usual.

Ms. Fortin added that Transfert ensures meeting minutes are written in a non-attributable manner, so that comments, proposals, or suggestions cannot be associated with a specific organization or individual.

PEDGI project update

Mr. Leblanc informed members that a communication was sent to Liaison Committee members further to the BAPE public hearings, discussions with the Ministry, and in response to community feedback. NGER committed to removing the turbines initially planned on the lagoon side (positions E6 and E7) from the project layout.

He also informed members that volume 8 of the environmental impact assessment was submitted to the Ministry of the Environment, the Fight Against Climate Change, and to the BAPE on April 21, 2026. This document notably specifies the turbine model currently under consideration, namely the Vestas V-136, with a capacity of 4.5 MW, which is currently considered the most suitable model for the site.

Mr. Maxime Gilbert, CEO of NGER, clarified that this choice is not final and remains subject to manufacturer availability and technological developments that may influence the final turbine selection.

Mr. Leblanc also informed members that the project's Facebook page has been updated to improve the dissemination of information to the public regarding various aspects of the project.

SUMMARY OF DISCUSSIONS	
Questions, concerns, or comments	**Responses from NGER or other stakeholders**
I understand that there will no longer be any reserve turbine locations on public lands?	That is correct.

SUMMARY OF DISCUSSIONS	
Questions, concerns, or comments	**Responses from NGER or other stakeholders**
Regarding location E5, when do you expect to be able to determine whether this reserve location will be used, if applicable?	This assessment will be carried out as part of the upcoming project site layout and engineering work planned over the next few months. Further discussions with targeted organizations are also planned to address turbine site layout. Two specialized firms are currently conducting studies related to the site layout, and their work is expected to be completed in approximately six weeks.
Will the BAPE process still be underway when the site layout analysis is completed?	The deadline for submitting the BAPE report to the Minister is set for June 9, with public release expected around June 23. As such, drafting of the report should already be well advanced when the site layout analysis is completed.
Could ongoing discussions with Hydro-Québec regarding grid integration influence the choice of turbine model?	Grid integration studies with Hydro-Québec will be carried out. The objective is to identify the turbine model best suited to site conditions while meeting Hydro-Québec's technical requirements.
Could the fact that the turbine model is not finalized prior to the release of the BAPE report lead to significant changes that could affect the public and social acceptability (e.g., turbine size or number)?	Based on our understanding, the project will be governed by a governmental decree setting parameters such as the number of turbines. We can confirm this with the Ministry if needed. From our perspective, any change in the number or model of turbines would be considered with the objective of improving the project's social acceptability. Contractual obligations with Hydro-Québec are also a key limiting factor.
Are you limited in terms of the number of turbines planned for the project?	The environmental impact assessment presents a four-turbine project, which currently serves as the reference framework.
I congratulate you on your decision to remove positions 6 and 7. Regarding concerns raised in Grosse-Île, how will you take into account residents' feedback requesting that turbines be located closer to those of the PEDDN project?	It is not possible to concentrate all turbines solely in the Grand-Étang sector; therefore, installing turbines near the Seleine mine is unavoidable to move the project forward. Public communications are planned in the coming week to explain the constraints and criteria that led to this site selection.
It will be important to clearly explain these reasons to the population.	This is indeed our objective, and we welcome your input on this matter.
I would like to better understand, from the Municipality of Grosse-Île, whether the opposition	According to the Municipality, mobilization appears to come primarily from a limited number of

SUMMARY OF DISCUSSIONS	
Questions, concerns, or comments	**Responses from NGER or other stakeholders**
reflects a broad divide within the population or rather a more limited mobilization.	individuals. No complaints regarding existing turbines have been recorded to date. Certain elements of the petition also raise questions about its representativeness.
Has reflection begun on how revenues generated by the project will be communicated and used in Grosse-Île?	The Municipality indicated that revenues could ease the municipal budget, though these benefits are not very tangible for the population. Residents' concerns mainly relate to site location and landscape impacts, rather than the project's positive financial outcomes for the Municipality.
Has the researcher recommended by Attention FragÎles been contacted?	No outreach has been made yet. However, NGER has awarded a mandate to WSP to implement a coastal and dune monitoring program. NGER will assess whether to integrate the researcher's expertise into this program.

In addition to the summarized Q&A, members shared broader reflections, mainly regarding the BAPE hearings:

- The level of opposition expressed by some Grosse-Île residents was unexpected. Significant concerns were raised about erosion, while concrete data on project benefits (including greenhouse gas reductions and overall positive net impact) received limited attention.
- Opposition would have been more understandable prior to the construction of the Dune-du-Nord wind farm. Given that turbines are already in operation, generating significant benefits and exceeding Hydro-Québec's performance expectations, the current level of opposition remains surprising.
- There is strong public interest in GHG reduction measures, and some surprise regarding the current wind farm's contribution to emissions reductions in the Islands. While residents' concerns are legitimate, the benefits of the project should also be clearly communicated.
- Perceptions among Grosse-Île residents appear linked to limited visibility of positive project spin-offs, potentially due to geographic distance and language barriers.
- The Municipality and CMIM play a key role in disseminating information more broadly, including to residents who are more skeptical about climate change.

Workshop on the Community Engagement Plan

Ms. Fortin first presented the scope and objectives of the Community Engagement Plan, which had been shared with members in advance by email to allow them to review it prior to the workshop.

Members then took part in a participatory workshop to discuss and enhance the action plan included as an appendix to the Community Engagement Plan. The outcomes of the workshop are summarized below:

PILLAR 1 – STRENGTHEN ACCESSIBILITY, CLARITY AND INFORMATION SHARING

Subject	Observation	Proposed solution
Understanding the social climate	Difficulty to accurately identify the perceptions, concerns, and expectations of the Grosse-Île population	Better document local community perceptions
Access and information sharing	Language realities specific to Grosse-Île	Systematic sharing of information in both French and English
	Limited reach of local media to effectively reach Grosse-Île residents	Diversify communication channels
	The Community Engagement Plan document is complex and lengthy for the general public	Produce a clear, plain-language summary document (1 page)
	Importance of maintaining information at the Magdalen Islands scale	Maintain information and dialogue initiatives for the entire Magdalen Islands population
PEDDN	Limited awareness of the project's positive impacts during the operational phase	Issue a communication highlighting the performance and positive impacts of PEDDN
Project credibility	Need for perspective and comparison with successful projects in island contexts and divided communities	Share examples of successful wind projects in comparable contexts (e.g., the Orkney Islands, Scotland)

PILLAR 2 – ESTABLISH ONGOING DIALOGUE WITH THE COMMUNITY

Subject	Observation	Proposed solution
Liaison Committee	Facilitate the participation and understanding of English-speaking members from Grosse-Île	Hold Liaison Committee meetings in Grosse-Île
		Reflect on the language used during Liaison Committee meetings (French, English, or bilingual)
	Questions regarding the representativeness of the Liaison Committee and the need to broaden the range of perspectives represented	Assess the current representation within the Liaison Committee to determine whether adding a dedicated seat for land users would be appropriate.
		Assess the current representation within the Liaison Committee to determine whether adding a dedicated seat for community organizations would be appropriate.

Community Liaison Officer	Lack of a structured link between PEDGI, the municipality, and the population	Hire a community liaison officer from Grosse-Île
	Uncertainty regarding the identification of an appropriate individual	Prioritize a person from Grosse-Île (current or former resident)
	Need for support in identifying or supporting this role	Approach the *Council for Anglophone Magdalen Islanders (CAMI)* to assess the organization's interest in contributing to the identification or fulfillment of the community liaison officer role
Working group	Risk of diluting issues specific to Grosse-Île	Dedicate the Working Group specifically to Grosse-Île

Additional questions were raised regarding the self-nomination process for integrating citizens into the Working Group and the Liaison Committee. Ms. Fortin provided the following clarifications regarding this type of process:

- The process allows citizens to put themselves forward, with representatives selected by citizens themselves during an in-person public meeting.
- Candidate selection is based on predefined criteria, including place of residence, interest in the project, and availability.
- The importance of trusting a process overseen by an external facilitator was emphasized.
- It was also noted that an important contextual factor in Grosse-Île relates to meeting scheduling due to the fishing season; meetings should ideally take place outside the April/May to August period.

PILLAR 3 – SUPPORT THE INTEGRATION OF CONCERNS AND FOLLOW-UP ON COMMITMENTS

Due to time constraints, this axis was not discussed. Members were invited to submit comments by email.

PILLAR 4 – OVERSEE THE CONSTRUCTION PHASE AND IMPACTS MANAGEMENT

Due to time constraints, this axis was not discussed. Members were invited to submit comments by email.

Meeting conclusion

Mr. Leblanc thanked members for their participation and informed them of upcoming communications related to PEDDN that members may help relay to the public.

He also noted that Hydro-Québec will be carrying out maintenance work on the transmission line. NGER will take this opportunity to also conduct turbine maintenance. A communication will be issued to inform the public of the planned temporary shutdown.

APPENDIX 1: MEETING PRESENTATION

Liaison Committee – Dune-du-Nord and Grosse-Île Wind Farms

Rencontre du 23 avril 2026

PARC ÉOLIEN DUNE-DU-NORD

PARC ÉOLIEN GROSSE-ÎLE WIND FARM

Agenda

13 h 00	Opening of the meeting
13 h 05	Adoption of the draft agenda
13 h 07	Members' updates
13 h 18	Approval of the minutes from the December 3 meeting
13 h 20	**PEDGI project update**
13 h 40	**Workshop on the Community Engagement Plan**
14 h 30	*Break*
14 h 40	**Continuation of the workshop** on updating the Liaison Committee
15 h 25	Closing of the meeting

2

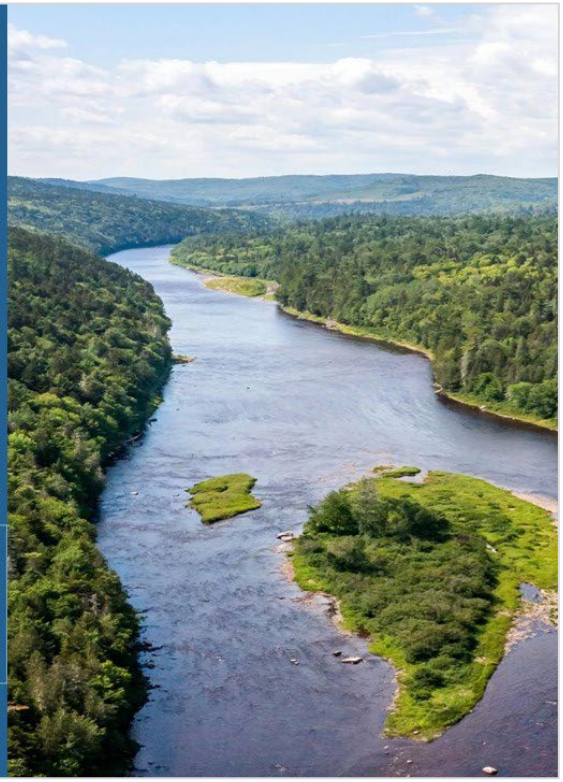

1. Provide an **update on the project's progress following the BAPE hearing**
2. Refine and validate the **Community Engagement Plan**
3. Identify potential actions and discuss **updates to the dialogue structures** around PEDDN and PEDGI

3

Our role

- ✓ Support Nutrinor Gilbert – Énergies renouvelables in implementing a thoughtful and well-structured Community Engagement Plan aligned with recognized best practices in community relations
- ✓ Act as a neutral resource person
- ✓ Coordinate and facilitate the participatory workshop on the Community Engagement Plan with the Liaison Committee
- ✓ Prepare a summary of discussions
- ✓ Ensure follow-up on outstanding questions

Meeting facilitator

Stéphanie Fortin

Note-taking and facilitation support

Justine Simard

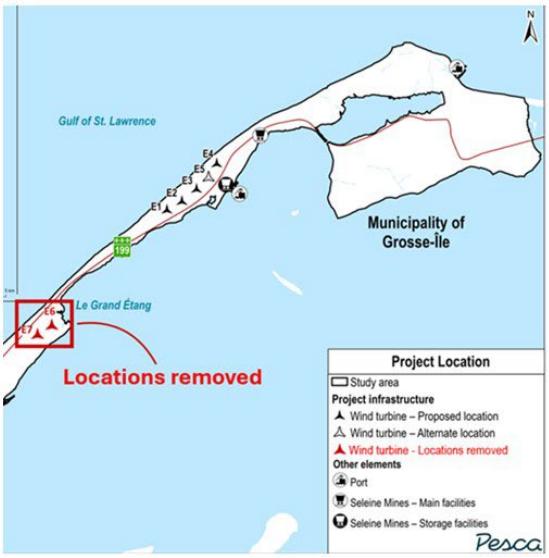

5

PEDGI Project update

Following ongoing discussions with the local community, recent BAPE hearings, and exchanges with the Ministry of the Environment and the Fight Against Climate Change

- **Commitment to remove the wind turbines initially planned on the lagoon side** (positions E6 and E7)

8

PARC ÉOLIEN DUNE-DU-NORD

PARC ÉOLIEN GROSSE-ÎLE WIND FARM

COMPTE-RENDU

RÉUNION DES COMITÉ DE LIAISON DU PARC ÉOLIEN DUNE-DU-NORD ET PARC ÉOLIEN DE GROSSE-ÎLE

Date : Mardi 3 décembre 2025
Lieu : Salle communautaire de la mairie

Présences :

Simon Deschênes, Alliance de l'Énergie de l'Est
Lou Landry, Alliance de l'Énergie de l'Est
Jacques Gauthier, Nutrinor-Gilbert énergies renouvelables
Maxime Gilbert, Nutrinor-Gilbert énergies renouvelables
Jean-Michel Leblanc, Chargé d'exploitation PEDDN, Nutrinor-Gilbert énergies renouvelables

David Richard, Chef de section, CMIM
Marie-Ève Giroux, en remplacement de Jasmine Solomon, Cheffe de section action climatique, CMIM
Gordon Burke, Maire, Municipalité de Grosse-Île
Daniel Gaudet, Direction, SADC
Jean-Philippe Lepage, Direction, Comité ZIP (à distance)
Mélanie Bourgeois, Direction, Attention Fragiles
Michel Bonato, Direction, Tourisme Îles-de-la-Madeleine
Martin Paquette, Direction, Chambre de commerce
Marc-Olivier Massé, Direction associée, CERMIM

Absences :

1. Ouverture de la réunion

   La réunion a débuté à 8:00 HAE

2. Tour de table et nouvelles des membres

Un tour de table est fait pour présenter les nouveaux représentants aux comités.

Jean-Michel Leblanc fait le point sur la panne générale de la semaine passée et les articles impliquant le parc éolien. Hydro-Québec a confirmé que la source de la panne ne provenait pas du parc l'éolien et ils ont fait des rectifications dans les médias. Les systèmes du parc ont réagi normalement pour protéger le parc et le réseau lors de cette panne du côté d'Hydro-Québec de la ligne haute tension 778.

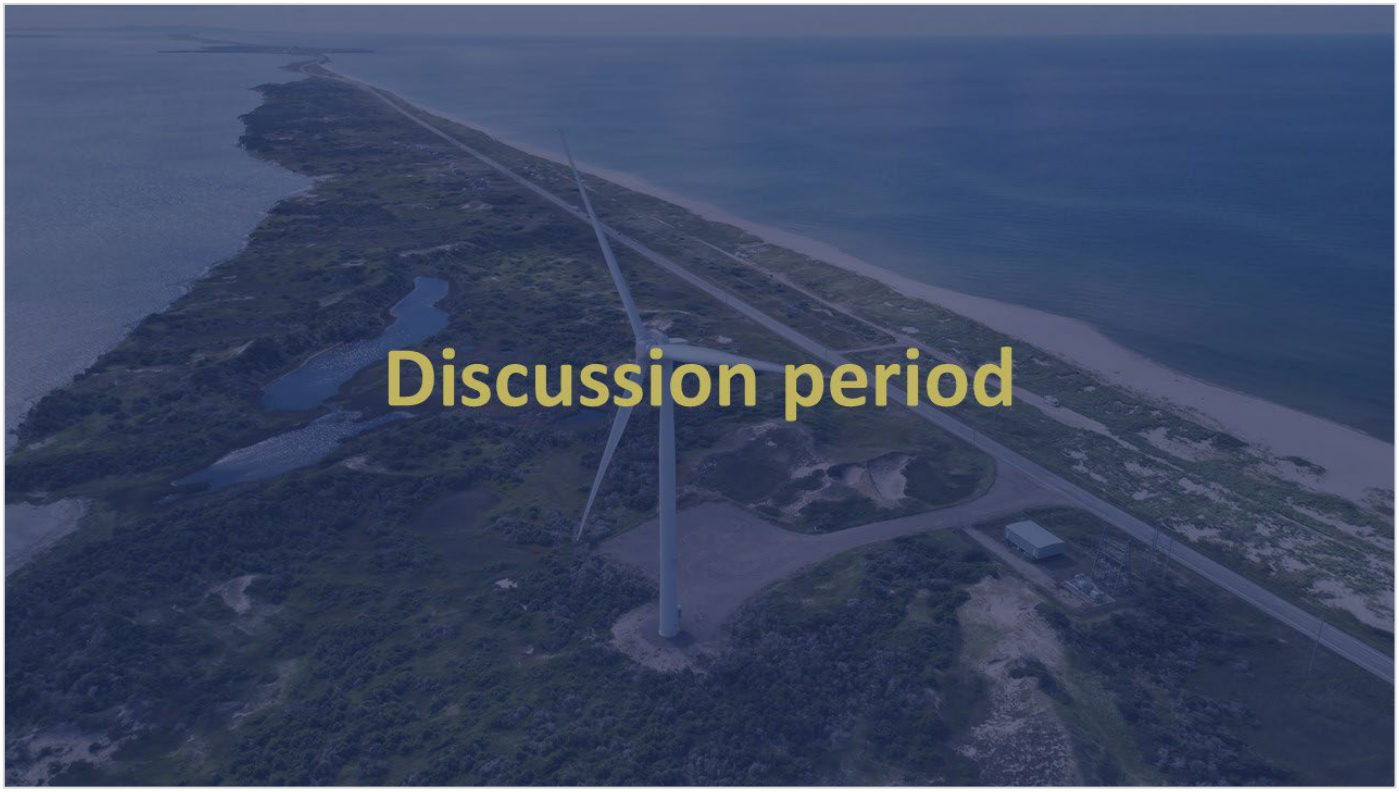

7

PEDGI Project update

- Submission of **Volume 8 of the Environmental Impact Assessment** to the Ministry of the Environment and the Fight Against Climate Change on April 21, and to the BAPE
- Update of the **project's Facebook page**
- Upcoming : Implementation of a more structured **donations and sponsorship** program

9

Scope

- Aims to **structure and guide information-sharing, dialogue, and follow-up activities** with the community
- Emphasizes the **quality of relationships with the community**, a central component of the project
- Translates findings from work completed to date into a **clear and coherent engagement approach**, aligned with the current project phase
- Supports the **implementation of commitments** and clarifies governance and monitoring mechanisms
- Designed as a **living document**, evolving with the project's progress and ongoing dialogue with the community
- Developed in line with **best practices in community relations**

11

Community Engagement Plan

Engagement Plan objectives

1. Strengthen accessibility, clarity and information sharing

- Ensure proactive, accessible information sharing adjusted to the linguistic and territorial realities of Grosse-Île, so that community members can better understand how the project is progressing and what lies ahead.

2. Establish an ongoing dialogue with the community

- Establish and strengthen dialogue mechanisms that enable meaningful citizen participation, particularly through increased citizen representation within exchange bodies.

3. Support the consideration of concerns and follow-up on commitments

- Provide a structured framework for receiving, analyzing, and following up on concerns raised by the community, as well as for implementing project commitments and reporting on their outcomes.

These objectives form the pillars of action around which the engagement action plan presented in the appendix is structured.

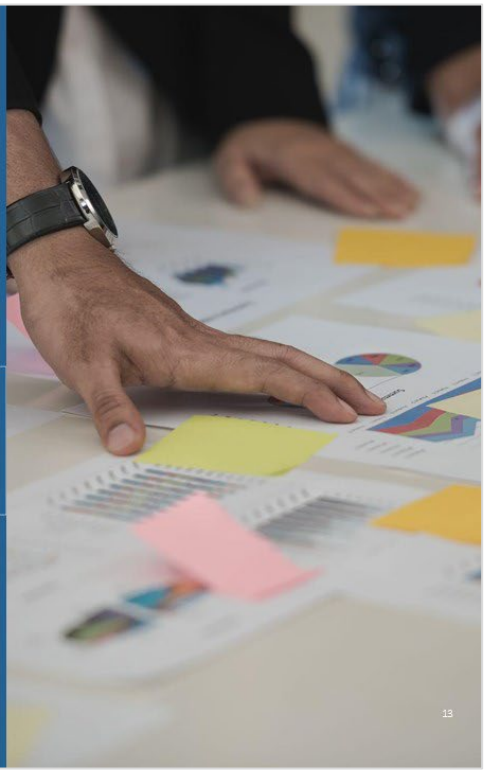

12

TRANSFERT
ENVIRONNEMENT ET SOCIÉTÉ

Workshop

PART 1

Workshop on the Community Engagement Plan

13

WORKSHOP OBJECTIVE

Refine and validate the PEDGI Community Engagement Plan to ensure its relevance, clarity, and practicality.

14

WORKSHOP FLOW

5 Min.

1. Individual reflection

- **Individually,** note your thoughts and suggested revisions to the proposed action plan
  - ➢ You are encouraged to add your suggestions directly in Miro

45 Min.

2. Discussion

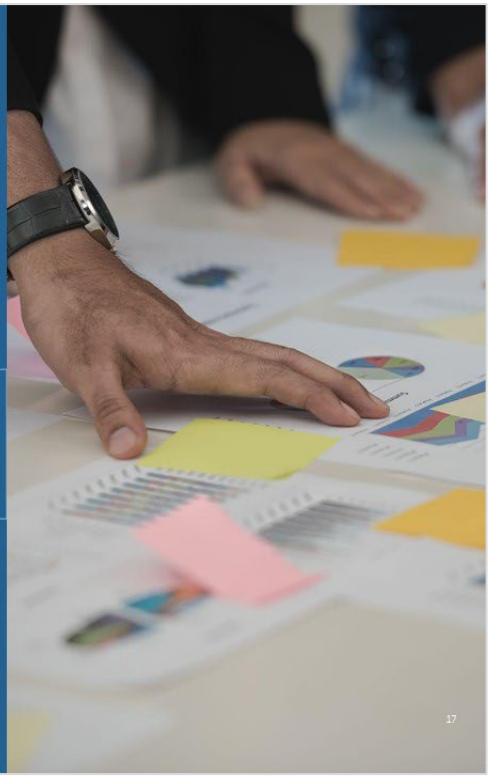

- **In group,** share your thoughts and proposed revisions in turn for each action area of the plan

15

TRANSFERT
ENVIRONNEMENT ET SOCIÉTÉ

Workshop

PART 2
Continuation of the workshop on updating the Liaison Committee

17

WORKSHOP OBJECTIVE

Discuss updates to the dialogue bodies around PEDDN and PEDGI (Liaison Committee and Working Group)

18

1. Share the **meeting minutes** for review (in a new format) within the next **3 weeks**
2. Revise and share the **final version of the Engagement Plan**
3. Upcoming email communications regarding the **plan's short-term next steps**
   - **Call for applications** to recruit community members to the Liaison Committee and the Working Group

19

APPENDIX 2: ENHANCED ACTION PLAN INCORPORATING MEMBERS' SUGGESTIONS

* **Note**: newly added or revised actions are show in green.

PILLAR 1 – STRENGTHEN ACCESSIBILITY, CLARITY AND INFORMATION SHARING			
ACTION	**MECHANISM/ACTIVITY**	**TARGETED STAKEHOLDERS**	**TIMELINE**
Provide regular, clear, and accessible information on the project's progress	Update information tools (website, social media, targeted communications)	Population of Magdalen Islands	Ongoing
	Involve members of the Liaison Committee and the Working Group in improving information and communication mechanisms for Magdalen Islands citizens	Liaison Committee members	Fall 2026
	Sharing a press release on the strong performance and positive impacts of the Dune-du-Nord Wind Farm	Population of Magdalen Islands	Spring 2026
	Sharing concrete examples of successful wind energy projects in comparable settings	Population of Magdalen Islands	Fall 2026
	Adapting communication channels in response to the limited reach of local media at Grosse Île (strategic community posting, amplification through local organizations, and direct mailings)	Population of Grosse-Île	Ongoing
Share key directions of the community Engagement Plan with citizens	Distribution by mail of a summary document outlining the engagement approach, dialogue mechanisms, and key opportunities of participation for Grosse-Île residents	Population of Grosse-Île	Spring 2026
	Share and discuss the upcoming engagement approach through targeted meetings with local organizations	Municipal administrations and targeted organizations	Spring 2026

PILLAR 2 – ESTABLISH ONGOING DIALOGUE WITH THE COMMUNITY

ACTION	MECHANISM/ACTIVITY	TARGETED STAKEHOLDERS	TIMELINE
Review and enhance the mandate, composition, and operating framework of the Liaison Committee to strengthen community representation for both wind farms	Review of the Liaison Committee's mandate and composition	Liaison Committee members	Spring 2026
	Holding Liaison Committee meetings on Grosse Île whenever possible and providing bilingual arrangements to encourage participation from English-speaking members	Liaison Committee members	Ongoing
	Hold a validation and revision workshop for the proposed adjustments to the Liaison Committee	Liaison Committee members	Spring 2026
	Launch a call for applications to include citizens in the Liaison Committee and the Working Group	Population of Magdalen Islands	Summer 2026
	Hold a self-selection meeting	Population of Grosse-Île	Fall 2026
	Improve the Liaison Committee’s representativeness by adding seats for a community and social organization and a land user representative (fishers and hunters)	Community and socio-community organizations and land users	Fall 2026
Create a dedicated forum for Grosse-Île residents	Establish a Working Group for the pre-operational phase of the Grosse-Île wind farm	Liaison Committee members and population of Grosse-Île	Fall 2026
	Develop a workplan with the Working Group to address key topics of interest in a clear, relevant, and predictable sequence during the pre-operational phase	Working Group members	Fall 2026
	Hold three Working Group meetings per year and make meeting summaries publicly available	Working Group members	Ongoing
	Adjusting the meeting schedule to align with the fishing season	Working Group members	Ongoing
	Participate, when relevant, in public activities or events organized in Grosse-Île to support dialogue with the community	Population of Grosse-Île	Ongoing
	Developing an evolving profile of Grosse-Île residents’ perceptions, concerns, and expectations (targeted surveys, informal exchanges, and integration of findings from the Working Group)	Population of Grosse-Île	Ongoing

	Assessing, in collaboration with the Council for Anglophone Magdalen Islanders (CAMI) and the municipality, the feasibility of creating a Grosse-Île Liaison Officer position to support communication between residents, the project proponent, and local authorities	Population of Grosse-Île	Spring 2026
Structure discussions on site layout and visual impacts with targeted stakeholders	Engage Grosse-Île residents through targeted meetings to help identify priority viewpoints for the development of additional visual simulations	Population of Grosse-Île	Spring 2026
	Hold a meeting with Attention FragÎles and the ZIP to discuss project site layout	Environmental organizations	Spring 2026

PILLAR 3 – SUPPORT THE INTEGRATION OF CONCERNS AND FOLLOW-UP ON COMMITMENTS

ACTION	MECHANISM/ACTIVITY	TARGETED STAKEHOLDERS	TIMELINE
Ensure follow-up on issues raised by the community	Set up an internal tracking system for concerns and commitments to ensure consistent and structured follow-up with the community over time.	Population of Magdalen Islands	Spring 2026
Ensure structured and transparent processing of reports	Update the reporting management procedure	Population of Magdalen Islands	Spring 2026
	Provide periodic updates to the Liaison Committee on reported issues and recurring concerns	Liaison Committee members	Ongoing

PILLAR 4 – OVERSEE THE CONSTRUCTION PHASE AND IMPACTS MANAGEMENT			
ACTION	**MECHANISM/ACTIVITY**	**TARGETED STAKEHOLDERS**	**TIMELINE**
Anticipate and reduce construction-related impacts on the community	Presentation and review of the main issues related to the construction phase (noise, traffic, schedules, access, safety) as part of the Working Group's activities	Working Group members	Winter 2026-2027
	Presentation of traffic and heavy equipment transportation plans, discuss with the community and identification of possible adjustments	Working Group and Liaison Committee members	Winter 2026-2027
Ensure preventive communication with citizens	Targeted communications on how construction activities will unfold (phases, schedule, anticipated impacts, mitigation measures)	Population of Magdalen Islands	2027-2028
Implement impact monitoring during the construction period	Regular follow-up points with the Liaison Committee and the Working Group during construction to document observed issues and adjust measures as needed	Working Group and Liaison Committee members	2027-2028
	Use and promotion of existing reporting mechanisms for construction-related issues	Population of Magdalen Islands	2027-2028
